HW # 1

Legged, Wheeled and Flying Robots

Due: 28/10/2025, Time: 23:55

Conduct a literature search on legged, wheeled, and flying robots on the internet and write a report on 5 important legged robot projects, 5 important wheeled robot projects, and 5 important flying robot projects and their outcomes. The report should not be a copy of what you found on the web and should not exceed 20 pages. It should reflect your understanding of the literature about such mobile robots and important/critical achievements in the projects realized. To give you an idea such projects could be Honda's legged robot Asimo, Nasa's wheeled robot Sojourner, and Baykar's flying robot Bayraktar TB3. Submit your report as a PDF file through SUCourse.
